

Surface Product Specification Sheet

STERI-7 PURPLE L.A.F. 100ml Concentrate Sachet

General Purpose High Level
Multi-function Biocidal Cleaner/Disinfectant

Product Code: LAF005LTR
Product description: Polymer Sachet
Single Sachet: 100g size: 100x160x12mm
25 Sachets (inc box) 2.5kg size 340x175x100mm
100 Sachets (inc box) 10.0kg size 420x200x360mm

Product description

STERI-7 L.A.F. Concentrate Sachet is formulated to be diluted with 5Ltr of water for large volume cleaning solutions. And because you don't have to rinse, it's ideal for floors, walls and windows.

Product over view

STERI-7 is a high level, broad spectrum biocidal cleaner, proven in extensive laboratory tests to kill the most life threatening pathogens, this includes MRSA and Clostridium Difficile Spores, E.Coli and Salmonella.

Once dry it remains on the surface and reactivates in the presence of any moisture or a simple wipe of a damp cloth, to kill any pathogens subsequently introduced. This is due to a unique innovation known as Reactive Barrier Technology (RBT).

Developed for use on hard surfaces, soft metals and textiles such as worktops, floors, walls, doors, and sinks.

**KILLS PATHOGENS
99.9999%**

STERI-7 kills pathogens 99.9999% at the point of application and continues to protect surfaces between cleans.

Risk assessment

Upon review of previously cited literature and actual tests results, there is little probability that STERI-7 would cause an unexpected biological reaction during use as a surface disinfectant. This includes biological reactions such as acute toxicity and localised tissue toxicity.

At this time, no further testing is deemed necessary with respect to the biosafety of STERI-7. See NAMSA Laboratories risk report.

Technical information

Active Ingredients: Alkyl Dimethyl Benzyl Ammonium Chloride
5-chloro-2-methyl-2 H -isothiazol-3-one [EC No 247-500-7] and
2-methyl-2 H -isothiazol-3-one [EC No 220-239-6]

Precautions

See safety data sheet.

Contact kill times

Bacteria	Ps.aeruginosa	15 secs
	MRSA	30 secs
	Vancomycin-Resistant Enterococcus (VRE)	5 mins
	Ent.hirae	1 min
	Staph.aureus	1 min
	E.coli	30 secs
	Salmonella typhimurium	30 secs
	Salmonella enteritidis	5 mins
	Salmonella cholerae suis	5 mins
	Proteus Vulgaris	5 mins
Mycobacterium	Legionella	5 mins
	Listeria Mono	30 secs
Mycobacterium	Mycobacterium terrae	30 mins
	Mycobacterium Fortuitum	5 mins
Spores	Bacillus subtilis	30 mins
	Bacillus cereus	30 mins
	Clostridium difficile	2 mins
	Clostridium perfringens	5 mins
Yeasts	Candida albicans	15 mins
Fungi	Aspergillus niger	15 mins
Viruses	SARS	5 mins
	Hep C	5 mins
	Influenza A	5 mins
	HIV	5 mins

Conforms to

BS EN 1040, 1276, 1650, 13623, 13697, 13704, 13727 1404, 14347, 14348, 14349.

QCT -1, -2, -2-M. ISO 10993 certified. ASTM E1052(2002)

Defra General orders. Air Canada Test Protocol.

KEY BENEFITS:

Kills: Bacteria, Viruses, Spores including **Clostridium Difficile**, Mycobacterium, Fungi, Yeasts.

Reactive Barrier Technology (RBT) keeps on killing effectively between cleans.

Independently tested and verified.
Can reduce cleaning time by at least 33%.
No rinsing required (Just leave to dry).
Fast acting.
Multipurpose usage.
Non-foaming.

Non-toxic (See risk report).
Non-Irritant (ISO 10993).
Non-corrosive (AMS1451 A&B).
Non-Ethanol based.
Non-Chlorine based.
Classed as non hazardous to the environment.

FULLY COMPLIANT WITH THE EUROPEAN BIOCIDALE DIRECTIVE
