

“I want a product which gives me **safe and clean** surfaces with no chance of contamination. It should continue to **kill bacteria, viruses** and spores long after it has been applied, be **proven** by extensive laboratory tests, simple to use, and save me **time and costs.**”

NEW GENERATION CLEANER WITH RE-ACTIVE RESIDUAL BARRIER TECHNOLOGY

STERI-7 does it all and more.

STERI-7 is a specialist multi-function biocidal cleaner and is a breakthrough in cleaning because it provides greater hygiene for less cost and effort. It is both a cleaner and a disinfectant, yet unlike normal disinfectants it keeps killing germs long after it's been applied. This ensures treated areas remain protected between cleaning cycles, when the threat of contamination is greatest.

The result is round the clock safety, with no window of opportunity for germs to spread.

STERI-7 wipes out **MRSA**: Salmonella: E.Coli: TB: P.Aeruginosa: E.Hirae: Proteus Vulgaris: **Clostridium Difficile**: Bacillus Subtilis: Bacillus Cereus: Hepatitis C: NDV (avian flu): Influenza: Sars: Aspergillus Niger and Candida Albicans.
