

At last, a Hand Sanitiser that kills C.Difficile

and stays effective for up to 3 hours

STERI-7 is a non-alcohol foaming hand cleaner that provides unrivalled protection.

Kind to your hands, it is 100% organic yet so powerful it kills Clostridium Difficile spores (something no alcohol gel will do) together with MRSA and other life threatening pathogens, and it continues to be effective under soiled conditions.

At the same time, a barrier is created lasting for up to three hours. This is because of an innovation called RBT (Residual Barrier Technology).

STERI-7 Hand sanitiser can even be used as a substitute to soap, with running water.

SENTINEL
IRELAND LIMITED
