STERI-7

Because STERI-7 stays effective between cleans it's easier to keep an area safe. And it takes less time and money too.

trust it...

to go on working once dried, so that:

- Treated areas stay safe between cleaning cycles
- Any area missed by cleaners will stay contamination free for up to 7 days

profit from it

Using STERI-7 can cut cleaning time by up to 33% by:

- Removing the need to use different cleaning products for different materials and to rinse after application
- Allowing users to replace some full cleans with quicker check cleans

The cleaner that

kills

Bacteria, spores and viruses fast

lasts

Stays effective between cleans for permanent protection 24/7

guarantees

A clean, safe environment wherever applied

Close the window of opportunity for germs

STERI-7 is:

- ✓ Non-toxic
- ✓ Non-corrosive
- ✓ Non-irritant
- ✓ Environmentally-friendly
- ✓ Food-safe
- ✓ No ethanol
- ✓ Non tainting

STERI-7 is a breakthrough in cleaning because it provides greater hygiene for less cost and effort. It is both a cleaner and a disinfectant, yet unlike normal disinfectants it keeps killing germs long after it's been applied. This ensures treated areas remain protected between cleaning cycles, when the threat of contamination is greatest.

The result is round the clock safety, with no window of opportunity for germs to spread.

Kills Bacteria and Mycobacteria:

- ✓ MRSA
- ✓ Salmonella
- ✓ E. Coli
- ✓ TB (mycobacterium)
- ✓ P. Aeruginosa
- ✓ E. Hirae
- ✓ Proteus Vulgaris

Kills Fungi & Yeasts:

- ✓ Aspergillus Niger
- ✓ Candida albicans

Kills Viruses:

- ✓ Hepatitis C
- ✓ NDV (Avian Flu)
- ✓ Influenza
- ✓ SARS

Kills Spores:

- ✓ Clostridium difficile
- ✓ Bacillus subtilis
- ✓ Bacillus cereus

"Since we started using STERI-7 in our care home there has been a noticeable drop in the number of stomach upsets suffered by our residents.

It's proving a real help in reducing cross contamination."

Emma Miller, Teignmouth House care home, Devon

PROVEN

To clean, disinfect and stay effective once dried

STERI-7 makes a desktop as clean as a surgical instrument – and keeps it clean for days.

This is because of an innovation called RBT (Residual Barrier Technology), which allows STERI-7 to provide double protection against germs. When applied to a worktop, floor, wall, door, sink or even a fabric, the biocide in Steri-7 kills the germs present. At the same time, a lasting barrier is created that ensures that germs subsequently introduced to it will also be killed, just as effectively 24/7.

7 clear benefits:

- STERI-7 kills bacteria, spores and viruses within seconds
- There's no need to rinse a treated area after application
- STERI-7 goes on working even once dried
- It continues to eradicate germs 24/7
- It keeps treated areas safe between cleans
- It works in a wide temperature range of 4° to 60°C
- Your cleaning protocol can remain exactly the same

Allowance for human error

STERI-7's residual barrier means that if cleaners miss an area, as will happen from time to time, the area will remain contamination-free until it is next cleaned. And with bacteria and viruses all around us, that's a reassuring thought.

PROVEN

To cut cleaning time by a minimum of 33%

Because STERI-7 keeps working once dried, you'll find that areas that you normally need to thoroughly clean frequently will remain sterile with significantly fewer, or quicker, cleans.

The result is significant time savings and to quantify them, we asked i-Clean™ (a Cleaning Management System licensed by the British Institute of Cleaning Science) to calculate the time cost per square metre of using STERI-7 instead of normal cleaners.

i-Clean found that:

- Using STERI-7 can lead to time savings of at least 33% according to the area cleaned
- With manpower costs accounting for around 75% of cleaning costs, the resultant cost savings are significant
- The largest savings are found in areas that represent the greatest threat to hygiene as they have to be cleaned the most frequently
- As an example, an average village hospital with an annual cleaning requirement of 3,600 hours would be able to cut this to around 2,500 hours simply by using STERI-7

Cleaner and safer with STERI-7

Who is STERI-7 for?

Hospitals	Catering	Physiotherapy units
Prisons	Laboratories	Military barracks
Care homes	Gyms	Offices
Schools	Public lavatories	
Hotels	Dental practices	
Poultry farms	Vets
